

THE MIDTOWN COLLECTION

Our Midtown Collection is designed to fit most interiors. Its metallic face and satin color back piece makes for a clean and simple look. This sign is an elegant addition to any wall.

These signs are created using our Z-Build process, where we print raised elements along the Z axis of a substrate. This creates a more stable, natural looking product.

Sign Breakdown:

- 1/8" Horizontally Brushed Dibond
- Raised Pictorial in Black
- Raised Compliant Text in Black
- Raised Compliant Type II Braille in Black
- 1/8" Satin Acrylic (Colors Specified on right)

Signs in this collection come in 2 sizes; 6"x9" or 4"x6". The copy on the signs as well as pictorials are all created on a per project basis - Meaning, if your building needs a sign to say something that's not shown in this packet, it's no big deal.

The signs on the previous page are shown in Scarlet Red.
Here's how they look in our other colors;

Cobalt Blue

Daffodil

Black

This Collection can also be customized to fit **your** branding needs. Did you ever think ADA Signage could double as a marketing tool?
Well, it can.

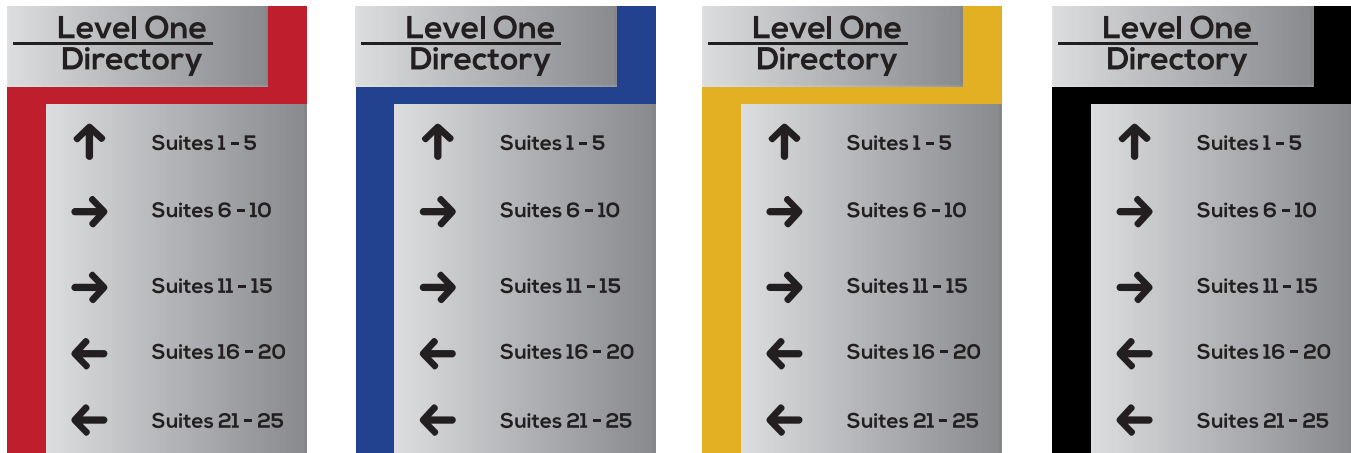

Our technology allows us to display your logo directly on the sign in full color **and** raised

No Collection could be complete without its own custom directory. This directory consists of 3 layers of acrylic, making it 1/2" thick all together.

The directory comes in a standard width, 14", but can vary in length depending on the number of "slats" needed per sign.

Again, the directory is available in 4 colors shown below.

Directory Breakdown:
